

Toyota Tacoma Prerunner 05-12
CAM-310029 (Swaybar Version)

4.0 Spindle Hardware (1 Left Spindle / 1 Right Spindle)

- | | |
|---|--|
| 4 | 5/8-18 x 3" DB 12pt Bolts (Stock Lower Ball-joint) |
| 4 | 5/8-18 G8 Nyloc Nuts |
| 4 | TY28MX 14" zip ties |
| 4 | 8.5" Camburg 3C Stickers |

Notes:

- 1) Must use longer length front brake lines as the stock versions are too short.
- 2) Brake rotor dust shields will not be re-used.
- 3) ABS sensor is relocated in spindle on top versus in front like stock.
- 4) Outer tie rod ends are installed on top of the steering arm, not below like stock.
- 5) Must use wheels with a maximum backspacing of 5.25" or the tire will rub on the spindle. Some factory wheels will not fit, measure prior to installing.
